TG1 • Investor Pitch Deck (1-Page)

TG Orchestration + AI Lead-Gen • System Account Licensing

Angel Round | ¥500k (~\$71k) | 11.1% Equity | Post-money ¥4.5M

ONE-LINER

TG1 sells the right to use "customized TG accounts + AI personas + industry knowledge bases + thousands of target groups" as a monthly subscription. From \$199, customers log in and start acquiring leads.

PROBLEM

- For global teams running TG private-traffic marketing, building it yourself requires:
- ¥300k upfront cost — SMS, proxies, device fingerprints, warm-up, control scripts, AI integration
 - 6-month dev cycle — most teams can't wait and can't pull it off
 - Ongoing ops nightmare — accounts get banned in batches, nobody wants the job
 - AI/sales disconnect — ChatGPT wrappers can't link user profiles or collaborate with sales

SOLUTION

From \$199/month, 5-minute setup. Platform supplies the entire infrastructure + AI lead-gen capability.

Customer logs in → picks industry → platform auto-customizes accounts+personas+KB
→ joins 500-3000 target groups → AI runs 7x24 lead-gen
→ high-intent alerts to sales for Copilot-assisted closing

PRODUCT

Ammo Layer	1000+ pre-warmed accounts (4 roles)
Capability	Orchestration + AI lead-gen + Copilot
Service	Auto-replace + CS + industry scripts

Tech Highlights:

- pgvector HNSW 768d vector KB (no Qdrant needed)
- Vertex AI Gemini (LLM + Embedding, no RPM limits)
- Listener 5-shard + multi-replica Workers for 1000+ accounts
- AI Copilot mode (drafts only, doesn't talk over sales)

BUSINESS MODEL — Three Tiers

Plan	Monthly	TG Accounts	AI Target Groups	Gross Margin
Starter	\$199	3	500	89%
Growth	\$299	5	1,000	85%
Pro	\$599	10	3,000	80%

Blended ARPU \$308/mo | Gross margin 84% | LTV/CAC ≈ 12 | Payback < 1 month

MARKET

- **Telegram MAU 900M+**, fastest-growing private-traffic channel
- **TAM USD 3B/yr | SAM USD 600M/yr | 3-yr SOM ¥50M ARR**
- **Target:** Crypto projects / cross-border e-commerce / B2B exporters / global SaaS

TRACTION

All 9 dev stages completed — 50+ backend services, 25+ frontend pages
1000+ account capacity battle-tested — sharding, connection pool, caching all in place
AI pipeline production-ready — pgvector + Vertex AI + Copilot mode
Production deployment ready — Docker + Nginx + Cloudflare

To fill: account pool size / beta customer count / current MRR

☒ MOAT

- ① **Account supply engineering** — Auto registration/warm-up/replacement, ¥25/account cost (vs ¥100-500 black market)
- ② **1000+ real engineering capability** — Competitors stop at 50-200 accounts
- ③ **AI Copilot product form** — Industry gap, AI ↔ sales two-way collaboration

FINANCIALS (3-Year)

	Y1 (2026)	Y2 (2027)	Y3 (2028)
Paying customers	60	280	900
ARR (USD)	\$222k	\$1.18M	\$4.32M
ARR (¥)	¥1.55M	¥8.25M	¥30.24M
EBITDA	-¥315k	+¥1.8M	+¥12M

M10-M12 monthly EBITDA breakeven → Y2 Q1 sustained profitability → Y2-end Series A

ASK

Raise	¥ 500,000 CNY (~\$ 71k USD)
Valuation	Post-money ¥ 4.5M
Equity	11.1%
Runway	12 months

Use of funds: Account pool 30% | Team 25% | Infrastructure 25% | Marketing 15% | Reserve 5%

Exit: Series A in 12-15 months (target ¥30-50M valuation) / Strategic M&A / Continued dividend
